

Task Abstraction

Why a Vis tool is being used

Actions of Vis Tools

- Consume or produce information
- Actions:
 - To present, to discover, to enjoy
 - To generate or verify a hypothesis
 - To search: either the identify or the location of the target
 - To identify one object, compare some objects, summarize all objects
 - To find trends or outliers; the minimum or maximum values; the distribution of values; the dependencies , correlations, or similarities; the topology of a network or a path; the shape of the data
