The world is yours!

TALK

Monsters are people too! Well, sort of. There's a lot about the world to be learned by talking to other creatures around you. Choosing the right words may reward you with bonus items or different endings!

FIGHT

When you're all out of options and your back is against the wall, you can always rely on your trusty weapon to get you out of a pinch against monsters. Don't expect them to go easy on you, though!

SNEAK

Sometimes monsters can seem intimidating, and it's a perfectly viable option to leave them alone in their natural habitat. Giving them gifts might increase your chances of getting past them without confrontation.
