Click **Left Mouse Button** to **attack**.
Attack directly **behind** enemy to **backstab**.

Tips

Different areas have different security levels. A disguise that works in one area may not work in another.

Disguises will protect you from being noticed at a distance, **but don't get too close**. Enemies can see through your disguise at close range.

Enemies remember the disguises you've used. Using the same disguise after you've been caught once won't work.
